**Osean**  
Osteopathic European Academic Network

## Dear colleagues in osteopathic education,

On behalf of the Osteopathic European Academic Network (OsEAN) we would like to welcome you to the 8th Open Forum "Teaching Clinical Competencies" in Antwerp, Belgium on the 29th and 30th September 2022.

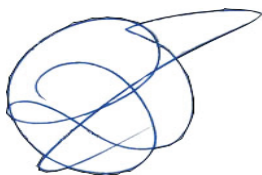

The osteopathic profession is practical and the top of that is the clinical environment. This Congress in Antwerp is all about this topic; to teach the clinical competencies to our students in all schools of Europe.

The presentations and workshops are focused on this subject: how do we teach, how do we judge, how do we apply, how do we arrange, etc. Or, in other words: 'how do we coach clinical competent practitioners?'

We have had an overwhelming response to our call for papers and are happy to present you an exciting programme that is covering all the relevant topics in this field.

Furthermore we would like to exchange and collaborate with each other to give our wonderful profession a solid foundation.

We are looking forward to welcoming you at our Open Forum Conference.

Robert Muts, D.O. MSc.

OsEAN President

The Osteopathic European Academic Network (OsEAN) is an organisation working with a mission for better osteopathic education and the enhancement of its quality. OsEAN's members share this common mission, exchange values and collaborate with vision for the future.

Our Vision for the future is that patients and the public are confident they will receive high standards of osteopathic care no matter where they seek treatment in Europe.

Our Mission is to contribute significantly to the enhancement of the quality of European osteopathic care, and to act as a major driving force for the development of osteopathy as a recognized and regulated primary healthcare profession with high standards of education, training and practice throughout Europe for the benefit of patients.

All OsEAN schools hold the tenet that osteopathic training should be degree validated programme at an MSc level as a precursor to the attainment of admission to practice-life. Therefore, all schools strive for an academic partnership with a university to obtain that goal.

Currently the OsEAN members do have such partnerships with 13 different universities.

OsEAN is incorporated as a non-profit organisation in Vienna, Austria.
